DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: in page 8, reference number 31 is called two different things "two diffusion regions" in paragraph [0026], and "source/drain electrode" in paragraph [0027]. This is confusing and unclear.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 11 and 14-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description in the specification as originally filed of "wherein the doped region is completely surrounded by the source/drain electrode except for a surface to contact the filling of the bit-line".

Claims 11, 14-24 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a doped region 31, does not reasonably provide enablement for "wherein the doped region is completely surrounded by the source/drain electrode except for a surface to contact the filling of the bit-line". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. There is no description of "wherein the doped region is completely surrounded by the

Art Unit: 2823

source/drain electrode except for a surface to contact the filling of the bit-line" as discussed above and therefore insufficient guidance to enable one of ordinary skill in the art to determine suitable processes and associated conditions to achieve the instant invention.

There is no rejection based on prior art because there is no disclosure in the prior art of the limitations recited in claim 11 and 19.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
